

PRACTICAL ASSESSMENT – CREATIVE FRONT-END & UI/UX **INTERN**

Objective

As part of the first-stage evaluation for the **Creative Front-End & UI/UX Intern** position, shortlisted candidates are required to complete a practical website development task.

This assessment is designed to evaluate your creativity, UI/UX thinking, frontend development skills, responsiveness, animation skills, and attention to detail.

Task

Design and develop a **premium-quality 4–5-page website** based on the **SALON & BEAUTY CULTURE INDUSTRY**

The website should demonstrate a modern, professional, and visually engaging user experience rather than a basic/static website.

Minimum Requirements

- 4–5 fully designed and developed pages
- Modern and premium UI/UX
- Fully responsive for **desktop, tablet, and mobile**
- Smooth **animations, transitions, and micro-interactions**
- Clean navigation and good user experience
- Proper typography, spacing, colors, and visual hierarchy
- Reusable frontend components
- Clean and well-structured code
- Good loading performance and overall usability

Technology

Candidates may use modern frontend technologies. Preference will be given to solutions using technologies such as:

Next.js, Tailwind CSS, shadcn/ui, HeroUI, React Bits, Framer Motion or similar modern libraries

Submission

Please submit:

1. **Live Website URL**
2. **GitHub Repository URL**

<https://forms.gle/T1LvUvmhLwewMM1M9>

Important

This practical assessment will be a **major factor in selecting candidates for the next interview stage**.

We encourage you to give your **best effort** and demonstrate your creativity, technical ability, and understanding of modern frontend development.

We are not looking for a simple website — we want to see how effectively you can transform a business category into a **premium digital experience**.
